NPHCC Medical Surge Cache Usage Report..... 10

Cache Usage Policy

1. The medical surge caches may be needed for a response in another NPHCC hospital in time of emergency. The coordinator and/or steering committee have the authority to direct the deployment of medical surge cache supplies in response to an emergency. The HICS Form 257—*Resource Accounting Record* (see Attachment 19) will be filled out by the transferring facility and a copy provided to the NPHCC Coordinator within 30 days of the event.
2. The facility activating or requesting the medical surge cache will provide a written report, Medical Surge Cache Usage Report (see Attachment 3), to the NPHCC Coordinator within 30 days of the event.
3. Medical Surge Cache items may be shared with response organizations other than the hospital; however, the NPHCC coordinator or steering committee must approve any allocation of the cache items. They must follow the procedure listed in this Chapter.
4. Each hospital shall notify the NPHCC Coordinator as soon as possible upon internal use of any medical surge cache supplies.
5. Each facility may contact the NPHCC Coordinator for additional assistance with transportation of the cache items.
6. If more than one facility is requesting cache supplies, the coordinator will convene the steering committee or ad hoc leadership committee to determine allocation of cache supplies.
7. A memorandum of agreement (MOA) will be developed between NPHCC and each hospital and updated as needed.
